**Cricut Tools**

There are several tools that are made for use with the Cricut, and these can be checked out for use as well.

**Spatula:** Used for easily removing small objects or objects that are not easily removed from the design mat.

**Scraper:** Used to clean excess material from the design mat. Can also be used to smooth materials.

**Scissors:** Small tipped blade for cutting delicate or thin lines on projects.

**Weeder:** Used to remove waste material from the project, such as from the inside of letters.

**Scoring Tool:** Used with the Cricut machine to make score lines. Scoring is discussed in another section of the guide.

**Tweezers:** Used to secure projects while adhesive dries, safely hold projects when heat embossing, poke out small negative pieces from projects, and pick up small embellishments.
